

Eman Abdel Azim Mohamed Fahim Saleh

Chemical Engineering

The High Institute of Engineering and Technology in New Damietta.

Phone: (+2)01091691057 | | (+2)01015680294 **Email:** emanmonna17@gmail.com |

Address: New Damietta. Damietta, Egypt

Education

2012-2017

The High Institute of **Engineering and Technology** in New Damietta

(**Very good**)

Graduation project

Plant design of Methanol

Case study of Egypt | Methanex Company.

(**Excellent Degree**)

Objectives

I'm a **creative and adaptable** graduate with all aspects of **chemical engineering** including process **computer simulation, development**, equipment sizing and specification. Also have hands-on experience in making sure that standards of quality are met while production **costs** are kept as low as possible. **Showing myself** to be **self-motivated, organized, capable of working under pressure** and, **Qualified with a solid scientific background and creativity skills.**

Proven ability to use **applied research** and **problem-solving** skills for establishing the root cause of any **chemical-related failure**, as well as heading any investigations.

Personal skills

- Effective communication skills (Oral and written).
- Ability to work independently and work in a team environment.
- Ability to work under pressure and have a good experience at solving problems.
- Flexible handling a variety of tasks and shift priorities simultaneously.
- Attention to detail.

Languages

- Arabic: Mother Tongue
- English: intermediate

Courses

- Process simulation using hysys (module - A)
- Advanced Natural Gas processing course certificated over 35 hours training.

Training

- Belayim Petroleum company (PETROBEL) .
- Egyptian Natural gas Company (GASCO).
- General organization of import & export control Damietta port.

Experience

Dec 2017:mar 2018

production Engineer

DELTA ELECTRIC

Mar 2018: just now

Quality Engineer

Madina Monawra

Responsibilities:

- Maintained effective communications with various supervisory personnel .
- Performed test on outgoing quality control procedures and inspected all unit .
- Developed and followed all written procedures and ensured compliance to specifications.
- Evaluated product production assembly and ensured accuracy in quality assurance records.
- Administered external and internal units and ensured compliance to all quality control protocol specifications.
