New Damietta-Kafr saad

SKILLS

- Cisco-CCNA
- TCP/IP Networking
- IP Networking
- Security Fundamentals
- Wireless Networking Fundamentals
- Microsoft Office programs
- Cisco Packet Tracer
- Proteus8 Professional
- CST Studio

EDUCATION

Bachelor's degree in engineering

Higher Institute of Engineering and Technology, New Damietta

Very good 3.07 / 4.0
2018-2023

LANGUAGES

- Arabic (Native)
- English

CAREER OBJECTIVE

The goal of submitting my application for this job is to obtain the opportunity to gain sufficient experience for practical training in network engineering while making a significant contribution to this company.

WORK EXPERIENCE

Trainee Network Engineer

We Telecom at Port-Said 2020-2021

- Manufacture of fiber cables and their use in setting up a wireless network
- Setting up a network using fiber wires
- Learn about the wire cabinets found in the streets and how they work
- Measuring the efficiency of fiber cable and how to use it in underground connections
- Identify and study the Internet wires that connect cities to each other

Trainee Network Engineer

East Delta Electricity company 2021-2022

- How the machines used to produce electricity work
- How is electrical energy distributed and methods of conducting electricity
- Use switches and routers to make LAN and WAN network

PROJECTS

Design and implementation of reconfigurable filtenna for wireless communication

- My role is to design the final app with filtenna using AutoCad
- Design circular monopole antenna, defected micro strip structure filter and MIMO filtenna by using CST
- Using Arduino uno the first step in design the application
